George Yao

Summary

Computer science student at the University of Virginia with interests in software development, cybersecurity, cloud computing, and mobile application development.

Education

University of Virginia (UVA), Charlottesville, VA (2023 Fall - Present), GPA: 3.688/4.00
Bachelor of Arts in Computer Science, expected graduation May 2027
Formally accepted into UVAccelerate (accelerated Master's (4+1) track), expected May 2028

Relevant Completed Coursework: Data Structures and Algorithms, Discrete Math and Theory, Computer Systems and Org, Software Dev Essentials, Intro to Cybersecurity, Computer Networks, Defense Against the Dark Arts (malware, exploits, security mitigations), Artificial Intelligence

Technical Skills

Languages: Python, Java, C, SQL, JavaScript, Swift
Technologies: Node.js, Cloudflare Workers, Cloudflare D1, AWS, RESTful APIs
Tools: Git, Ghidra, Wireshark, AI-assisted development tools (ChatGPT, Copilot, Gemini)
IDEs: Xcode, Visual Studio Code, IntelliJ IDEA, PyCharm

Technical Experience

Task Tracker iOS App (2026 Summer) | <https://github.com/GogeUVA/FirstXcodeApp>

- Developed a native iPhone task management application using Swift in Xcode
- Implemented task creation, deletion, and completion tracking with an interactive mobile user interface
- Utilized SwiftData for persistent task storage across application sessions

Serverless Discord Bot (2026 Summer) | <https://github.com/GogeUVA/first-cloudflare-app>

- Built and deployed a serverless Discord bot using JavaScript, Cloudflare Workers, and Discord's Interactions API
- Implemented persistent note management features with full CRUD operations backed by Cloudflare D1 SQL database
- Integrated RESTful API from weather.gov to retrieve and present real-time weather data within Discord

Ansible GitHub Runner | Computer and Network Security club (2025 Fall)

- Contributed research on Ansible automation for GitHub runner deployment

Port Scanner | Intro to Cybersecurity (2025 Fall)

- Developed a Python port scanner using sockets to automate TCP port discovery

Course Review Application | Software Dev Essentials (2025 Spring)

- Developed a desktop course review application using Java, JavaFX, and SQLite with full CRUD functionality
- Implemented a GUI with SQLite-backed review storage

Additional Information

Certifications and Recognition

- AWS Certified Cloud Practitioner (Issued Aug 2024, expires Aug 2027)
 - <https://www.credly.com/badges/ceb8f29d-d2fb-4cbb-93ba-fb5bb4ce60a7>
- National Cyber Scholar, National Cyber Scholarship program (2023)

Leadership and Service

- Comics and Animation International Exploration Club | Vice President (2026–2027)
- Daigakon volunteer (2026)
 - Assisted with setup, ticketing, patrol, attendee support, and cleanup for a student-run anime convention.
